PROFESSIONAL SUMMARY

Motivated Computer Science student seeking entry-level full stack Developer roles. Skilled in Java, Python, JavaScript, HTML, CSS, and backend development. Hands-on experience through AI/ML and AWS internships, with knowledge of data structures, OOP, and problem-solving. Built scalable applications including Library and Bank Management Systems.

SKILLS

- **Languages :** Java,Python,JavaScript
- **Frontend :** HTML ,CSS
- **Tools :** Git, GitHub
- **Concepts:** Data Structures , OOP,DBMS

PROJECTS

Library Management System

- Developed backend system for managing book inventory, user authentication, and transactions
- Implemented borrowing/return features with proper data validation
- **Technologies:** Java

Bank Management System

- Built secure backend for managing customer accounts, deposits, withdrawals, and transactions
- Implemented validation mechanisms to ensure data accuracy and security
- Simulated real-world banking operations
- **Technologies:** Java

Rock Paper Scissors Game

- Designed responsive frontend with interactive UI and score tracking
- Deployed using GitHub Pages
- **Technologies:** HTML, CSS, JavaScript

EXPERIENCE

AI/ML Virtual Internship – EduSkills

- worked on machine learning models including predictive analysis
- Performed feature engineering and model evaluation
- Improved understanding of real-world AI applications

AWS Data Engineering Virtual Internship – EduSkills

- Gained hands-on experience in ETL processes and data pipelines
- Worked with AWS services for data storage and processing
- Built and optimized workflows for handling large datasets

EDUCATION

B.Tech in Computer Science and Engineering

Mother Theresa Institute of Engineering and Technology (2023 – 2027)

Higher Secondary School

A P Model School and Junior College (2021 – 2023)

Secondary School

A P Model School (2021)
